| object | quantity | item number | description |
| 1 | 1 | 10.14.05x | locking plate f. magnetic lock |

PARTICULARITIES

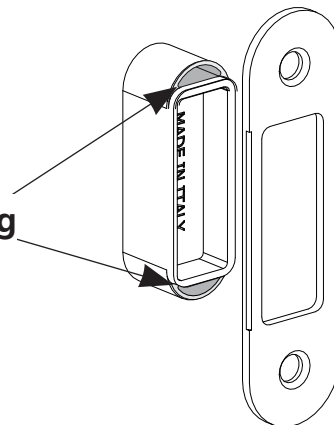

The locking plate consists of the sheet metal part and magnets.
The two parts must be glued.

Clean the adhesive surfaces of grease, oil or silicone films, as well as dirt particles.
Use lint-free cloths and cleaners.

For gluing you can use:
Innotec Topfix;
mounting glue, silicone or acrylic sealant

Area for gluing

Mounting:

You can turn the striker plate by 180° to get a higher fit between strikerplate and deadlock door lock.
